124                 ?>
125             </div>
126         </div>
127     </div>
128 </body>
129 </html>

```

- Output :

Soal 1

Maksimal muatan Truk 20000 kg

Truk menambah muatan sebesar 3000 kg
 Truk menambah muatan sebesar 8000 kg
 Truk menambah muatan sebesar 9000 kg
 Jadi, Butuh Bahan Bakar sebanyak 1 Liter

Maksimal muatan Perahu 35000 kg

Perahu menambah muatan sebesar 12000 kg
 Perahu menambah muatan sebesar 10000 kg
 Perahu menambah muatan sebesar 7000 kg
 Jadi, Butuh Bahan Bakar sebanyak 1 Liter

- Penjelasan :

Implementasi dari abstract class pada class Vehicle, method calcFuelNeeds digunakan untuk menghitung bahan bakar yang digunakan. Abstract method diletakkan pada class Vehicle sebagai parent class dan diakses oleh child classnya yaitu class Truk, dan class RiverBarge yang akan mengembalikan nilai yang dihasilkan dari pembagian 2 method yaitu calcFuelEfficiency dan calcTripDistance

126                                                                                                                     <div class="text-center">

```

- Output :

Soal 2

Superman

Superman melawan Batman
Superman mengejar Batman
Superman melancarkan pukulan
Batman terpental menabrak bangunan pencakar langit
Polisi menembaki superman namun ditangkis

Bird

Burung membuat sarang
Burung mencari makan
Burung terbang
Burung kembali pulang
Burung bertelur

Airplane

Pesawat lepas landas.
Pesawat dalam perjalanan
Pesawat mendarat

- Penjelasan :

Implementasi Polymorphism dengan penggunaan Interface Flyer sehingga semua class yang Implements dari interface Flyer harus memiliki method takeoff, land, dan fly.

3. Buat program berdasarkan UML berikut

- Kodingan :

- Output :

Soal 3

kucing sedang makan
Candra sedang makan

Maksimal muatan okey plane 100000 kg
okey plane menambah muatan sebesar 2000 kg
okey plane menambah muatan sebesar 4000 kg
okey plane menambah muatan sebesar 2000 kg
okey plane menambah muatan sebesar 9000 kg
okey plane lepas landas
okey plane dalam perjalanan
okey plane mendarat
Jadi, Butuh Bahan Bakar sebanyak 6 Liter

Superman sedang makan
Superman melawan Batman
Superman mengejar Batman
Superman melancarkan pukulan
Batman terpental menabrak bangunan pencakar langit
Polisi menembaki Superman namun ditangkis

- Penjelasan :

Terdapat interface Flyer dan abstract class Vehicle. Class airplane implementasi dari interface Flyer dan turunan dari Vehicle sehingga class Airplane harus memiliki method calcFuelNeeds, takeoff, land, dan fly. Class Bird implementasi dari Flyer dan turunan dari Animal sehingga memiliki method takeoff, land, fly, dan eat. Class Superman turunan dari homosapiens yang juga turunan dari Animal, serta implementasi dari interface Flyer. Maka class Superman memiliki method eat, takeoff, land, fly.

4. Buat program berdasarkan UML berikut

---	--	--

- Penjelasan :

Implementasi polymorphism dengan interface dan abstract class ditunjukkan pada class SeaPlane yang implements interface Sailer, turunan dari class Airplane yang implements Flyer dan child dari Vehicle sehingga class SeaPlane memiliki method dock, cruise, takeoff, land, fly, dan calcFuelNeeds.
